

GILDING & LEAFING: A PRICELESS ART WITH PETER GEDRYS
AUGUST 11-12, 2012

Schedule:

1. You will prepare a variety of surfaces including wood, glass and composition ornament using acrylic paint and gesso.
2. You'll refine the surface and apply the size. Size is the adhesive that will affix the leaf to the surface. Both acrylic and oil based sizes will be used.
3. The most important step prior to gilding is judging when the size "has come to tack" This is when the size is almost dry and will produce the best surface. Students will learn some tricks of the trade to determine this including listening for the "whistle tack"
4. Flash gilding the surface with mica powders will practiced.
5. Leafing the surface. Students will have the opportunity to use various leafs including Dutch Metal, aluminum and variegated leaf.
6. Sealing the surface. This will allow you to control tarnishing and add a glaze to create a patina.

Please Bring:

Apron, safety glasses, dust mask, gloves and your imagination

Peter
