Dear Woodworker,

Thank you for signing up for “Hand Planes and Their Uses.” Chris and I hope to help you get the most out of your hand planes.

We will cover sharpening extensively, including cambered blades and chip breakers, the importance of a flat sole, and how to set up hand planes properly. We will emphasize Lie-Nielsen planes, and will have the entire line for you to try out. We'll be happy to discuss and demonstrate the principles of tuning up any hand tools that you wish to bring to class.

We will also discuss tool making in general. We will spend some time on the history of Lie-Nielsen Toolworks, and will show a short video of a day at the Toolworks.

Please bring any tools that you would like us to work with, including scraping planes and hand scrapers. Please bring your favorite sharpening tools - water stones, oilstones, or sandpaper - and honing guides. If you don't have favorites, two water stones (800-1000 grit and 6000-8000 grit) and the side-clamping type honing guide will be fine. We will demonstrate how to use these three tools to get a razor sharp edge in minutes.

We look forward to meeting you on May 5th and 6th. If you have any questions, please feel free to email me at tln@lie-nielsen.com, or Chris Schwarz at chris.schwarz@fwpubs.com.

Best

Thomas Lie-Nielsen

ALL SATURDAY AND SUNDAY CLASSES START AT 9:00 AM EASTERN TIME

For all classes it is a good idea to bring is a pencil, notebook, a dust mask, ear plugs and without a doubt, safety glasses and a camera, if you would like to take pictures. ● **Classes marked with dot (●) do not have a specific tool list.**
If your class requires hand tools, the tool list will be with this page. Lunch is included and will be served around noon.

Date	Class	Instructor
