

SON OF SKEW: FEAR NOT

July 14-15, 2012

With Alan Lacer

Although quite a challenging tool in woodturning, Alan will take you through the shaping, refining, sharpening and honing of this versatile tool. You will then be shown and given the chance to practice at least 10 different cuts used in spindle turning. From there you will be guided through a series of projects that get progressively more difficult—and using only skew chisels. Open to anyone interested in developing his or her skill with the skew.

Objectives:

By the end of the class each participant will:

1. Demonstrate their skill at sharpening the skew chisel.
2. Perform at least 8 of the presented cuts with a medium to high level of consistency.
3. Using only skew chisels, complete at least three of the following projects: 3 eggs, tool handle, top, doorstop (with double pommel), and Christmas tree ornament.

Tool List:

Skew chisels*, 1/2" or 5/8" and a larger size between 1" and 1 1/2"

*I do **not** recommend the "oval style" skew chisels! Bring them if you must and we will discuss the limitations.

Diamond hone, fine grit (600 grit)

Eye protection is mandatory. Marc has a few face shields or safety glasses for purchase, but you might want to bring your own.

I will have a number of skews available for sale before and during the class. Contact me for a price list or visit my web site. On my web site there are articles on skew chisels, honing, and general sharpening. There are also two DVD's available on the site or from me directly related to the skew.

Please, please call, fax, write or email me if you have **any questions** or difficulty finding these supplies or questions about the class—I want you to have as productive a weekend as possible.

ALL SATURDAY AND SUNDAY CLASSES START AT 9:00 AM EASTERN TIME

For all classes it is a good idea to bring is a pencil, notebook, a dust mask, ear plugs and without a doubt, safety glasses and a camera, if you would like to take pictures. ● **Classes marked with dot (●) do not have a specific tool list.**
If your class requires hand tools, the tool list will be with this page. Lunch is included and will be served around noon.

Date	Class	Instructor
April 21-22, 2012	Introduction to Translucent Mineral Inlay	Stephen Hatcher
April 21-22, 2012	Fine Finishing with Hardware Store Materials	Tim Puro
