

John Beaver Class - Pre turned pieces.

These are sample shapes of pieces you will need for the class. 2 Bowls and 1 vase is the minimum you will need. You are welcome to bring more.

The bowls are face grain turning. Approximately 6" diameter and 3-4 inches tall, roughed and dry. The walls should be 1/2 - 3/4" thick when dry and returned to round. Please leave tenon on bowl. You have some flexibility in the shape but I recommend taller walls and a slightly closed rim.

The Vase is End Grain Turned. The piece should be dry with 3/4" wall thickness. Approximately 5" diameter and 7" tall including the extra base. The extra base is used for clamping and should be at least 1/2 wide. Slightly wider is better. The final vase will be cut off above the large base. Please make the tenon on the wider size. You have flexibility with the shape but these are good samples to start with.
