**Router Basics: Getting Comfortable with Your Router
With Andy Glantz**
May 18 – 19, 2019

Each Student should bring:

Router, if you own one
All router cutters you own

Class Schedule

The schedule each day will mix presentations and demonstrations by Andy

Day One, Morning: Router Basics

Presentation: Router function overview

- Router safety
- How routers work
- Cutters, collars, collets and fences
- Students will practice basic router use

Day One Afternoon: Jigs and fixtures

Presentation: Three basic router jigs

- Andy will demo the design and construction of each of the three kinds of jigs

Day Two: Jig design and production

- Each student will get a piece of hardware (or a task) and will make a jig to be used for its installation or production
- Class will review all jigs to share experiences and outcomes
