The ABC's of Spraying
August 11, 2019 (Sunday)

This is a one day class to assist you in deciding on what spraying system is best for you or how to better use the equipment you have.

If you can, bring along any spraying equipment you have so we can practice with it.

Syllabus

1. Reading the MSDS and PDS sheets on coatings
2. Turbine verses Compressed air
3. Fluid delivery
4. Spray gun parts and viscosity
5. How to adjust for air volume control
6. Accurate measuring of the wet mil thickness
7. Accurate measuring of the dry mil thickness
8. Gun maintenance

Tools

1. No tools needed
2. Bring your spray equipment if you want to use it.
