

## Beyond Your Basic Bowl With Rudy Lopez October 19-20, 2019

### **Saturday**

Discuss sharpening techniques, different bowl gouge bevel angles and profiles, check tools and re-profile if necessary.

Demo then proceed through the process of making an open profile natural edge wing style bowl.

Demo and move on to making a cut-rim or natural edge closed form round bottom bowl.

### **Sunday**

Demo and make my signature natural edge "bowl in a wing" style bowl.

Continue with finishing of bowls and/or if time permits another type of wing style platter will be demonstrated.

Clean-up.

### **Tool List**

1/2" or 5/8" Bowl gouge ground to 60 degrees

1/2" Bowl gouge ground to 40 degrees

Parting tool

Spindle/detail gouge 3/8" or 1/2"

3/4" or 1" diagonal and round-nose negative rake scraper.

If you do not have one I will have them for students to use. If you wish to grind your own please contact me prior to attending the class and I will provide information and a jig/template for you. If you would like to purchase these please contact me at [rudy@rudolphlopez.com](mailto:rudy@rudolphlopez.com) for information. I grind them on Thompson tool blanks.

Face shield. My favorite is the Uvex Bionic Face Shield with Clear Polycarbonate Visor and Anti-Fog/Hard Coat #(S8510).

(NOTE: The school has Face shields with a Z87+ rating available for purchase.)

Optional: Bring any other tools that you may be having difficulty with to develop your knowledge and skill that might relate to this style of turning.
