Dyes, Stains, Glazes and Toners with Mitch Kohanek

October 3, 2020 (Saturday)

Greetings,

This is a one day class to introduce you to a variety of ways to color wood that professionals use every day.

Dyes and Stains are generally used on raw wood. Glazes are used to add a depth to the color and also color strike the open pores. Toners can be used to lay a "blanket" of color to affectively adjust the final color.

There will also be an introduction to changing the color of each of these four materials using the information found on an artist's color wheel.

No material or tool list is needed.

Mitch
