

**How to Turn an Exact Sphere
Without Measuring Tools
with Hans Weissflog
October 17-18, 2020**

Hans Weissflog

e-mail: hans.weissflog@t-online.de

Tools we need:

3/8" Gouge (Spindle and Bowl)
Round nose scraper (1/2" wide)
Skew chisel (Not too big, 1/2" would be perfect)
Caliper
Sanding paper (100, 150, 240, 400, 1000)
Eye Protection – Safety Glasses and full face shield – ANSI standard of Z87+ rating

This weekend we will turn a sphere exact round without measuring, and turn the cup chuck that we need. We will also hollow out end grain with a gouge, and practice a lot.
