Added January 2020 from Grant:

I would like to ask that each student bring pencil/paper and a dremel tool with flex shaft (or a Fordham is great. Also, if one wants to purchase one, harbor freight has a very affordable model.) I'll bring a few but I don't have enough for a full class of 16 students. I'd like to add that if any of these students have carving tools and enjoy carving already, they should bring those tools.

I don't want to make this a requirement, but rather a suggestion.
